Subject fecal and coliphage hits - Fw: Pine View Estates

Hey Aaron,

Just an fyi about Pineview. They haven't returned a call I left the week before last. I'll check with them to make sure the UV disinfection system is up and running. I

b5

Subject: Pine View Estates

Eric,

I just called Pine View and left a message from them to call me back but I thought you might like/need to know as well.

I just got the Coliphage report from Biovir labs and it looks like one of the monitoring wells has some type of contamination. The B2 well had a hit for fecal coliform at 7.0 cfu/100 mL and a Bactriophage hit at 2 pfu/100ml. I was waiting until I got the Biovir report to confirm the fecal hit. All the other wells are less than the reporting limit.

I apologize that we don't have the entire report yet, we are running a little behind on the TKN's for the wastewater samples but I thought you guys might like to know before we are able to get the entire report out.

Let me know if you need anything else.
